Foreword by Ben E. Benjamin, PhD ix
Foreword by Janet M. Peterson, PT, DPT xi
Preface xiii
Acknowledgements xv
Introduction xvii

PART ONE Why Manual Therapists Get Injured ■ 1

1 Raising Your Awareness of Injury Risk ■ 3

Looking at the Facts 4
Putting Injury Risk into Perspective 8

2 Weak Links in the Body ■ 10

Thumbs 12
Hands/Wrists 13
Shoulders 14
Neck/Upper Back 15
Lower Back 16
Protecting Your Weak Links 17

3 Risk Factors for Musculoskeletal Disorders ■ 18

A Multifaceted Approach for a Complex Problem 19
Personal Risk Factors 22
Work-Related Risk Factors 27
Risk Factors Outside of Work 39
Risk Factor Exposures that Lead to Injury 41
Assessing Your Injury Risk to Prevent Injury 43

PART TWO Preventing Injury ■ 45

4 Using Ergonomics in Your Work ■ 47

Equipment, Tools and Workspace 49
Managing Your Work Schedule 59
Choosing Your Work Situation 66
Using Ergonomics to Help Your Clients 71

5	Developing Good Body Mechanics	75
	Defining Good Body Mechanics	76
	Breathing	77
	Posture	79
	Movement	91
	How Good Body Mechanics Impact the Client's Experience	103
	Maintaining Awareness of Your Body Mechanics	103
6	Modifying Your Techniques	106
	Reducing Stress to the Fingers and Thumbs	107
	Reducing Stress to the Hands and Arms	117
	Reducing Stress to the Shoulders and Lower Back	123
	Being Creative with Your Techniques	133
7	Looking at Your Emotions and Your Work	135
	Difficulty Setting Limits with Clients	136
	Inflexibility about Treatment Methods	137
	Unrealistic Expectations of Yourself	138
	Inaccurate Beliefs about Work-Related Pain and Injury	140
8	Special Considerations and Tips	141
	Students	141
	Chair and On-site Massage	146
	Spa Practitioners	148
	Older Practitioners	150
	Female Practitioners	152
	Male Practitioners	154
9	Injury Prevention Outside of Work	156
	Protecting Your Hands Every Day	157
	Reducing Stress to Your Musculoskeletal System in Daily Activities	158
	Protecting Your Joints	161
10	Your General Health	163
	Eat Well	163
	Get Plenty of Sleep	166
	Don't Smoke	169
	Limit Caffeine Consumption	169

Drink Alcohol in Moderation 170
Receive Massage Frequently 170
Practice Relaxation Techniques 173

11 Physical Conditioning ■ 174

A Multifaceted Approach to Conditioning 175
Creating Your Comprehensive Conditioning Program 178
Organizing Your Workouts 198
Frequently Asked Questions About Conditioning 202

12 Planning for Career Longevity ■ 206

Being Prepared for the Possibility of Injury 208

PART THREE Injury, Treatment and Recovery ■ 211

13 Understanding and Responding to Symptoms ■ 213

Recognizing the Typical Symptoms of MSDs 214
How Your Body Responds to Injury 222
Seeking Medical Evaluation of Symptoms 226

14 Injuries Common to Manual Therapists ■ 228

Muscle and Fascia Injury 229
Tendon and Tendon Sheath Injury 233
Bursa Injury 237
Ligament, Cartilage and Joint Injury 238
Nerve Injury 242
Facing the Possibility of Injury and Seeking Treatment 249

15 Diagnosis and Treatment of Injuries ■ 253

Getting a Diagnosis 254
Selecting a Principal Healthcare Provider (PHP) 256
Determining the Cause of Your Injury 260
Developing a Treatment Plan 261
Conservative Treatment of MSDs 264
Surgical Treatment of MSDs 280
Returning to Work 283
Continuing in Your Profession Following Injury 285

16 When Injuries Become Chronic ■ 287

Coping With a Chronic Injury 289

Continuing to Work with a Chronic Injury 295

Making Long-Term Decisions About Your Career 295

17 Conclusion: You Are Not Alone ■ 298

Learn to Be Good to Yourself 299

Appendix A: Risk Factor Worksheet 300

Appendix B: Ergonomics for Your Computer Workstation 304

Appendix C: Recommendations for Massage Schools 305

Appendix D: Recommendations for Spas 314
